PROJECTS:

❑ E-Commerce App (External) :

DESCRIPTION:

We developed a comprehensive e-commerce platform for a telecom client, offering a wide range of products including eSIMs, SIM cards, phones, tablets, data plans, and network devices. This platform provides robust online purchasing capabilities, ensuring a seamless and efficient user experience for customers to browse, select, and buy telecom products.

❑ Legal Management App (External) :

DESCRIPTION:

We developed an innovative application for managing all legal matters for clients. This platform enables users to create individual cases for incidents involving employee allegations, competitor disputes, or government issues. Within the app, we store comprehensive details of litigations involving the client organization, capturing all pertinent information related to the individuals and organizations associated with these matters. This ensures a centralized, detailed, and easily accessible repository of all legal affairs, facilitating streamlined case management and informed decision-making. https
